## Annapolis, MD Police Station

Repaired Exterior Brick Facade, Installed Flashing & Waterproofing,  
Eliminated Ongoing Water Infiltration

**OWNER:** City of Annapolis, MD  
**ENGINEER:** Tadjer-Cohen-Edelson Associates Inc.

### DESCRIPTION

CSI was awarded the contract to rectify a water intrusion problem that another contractor had failed to correctly solve at the Annapolis Police Station between the building's second and third floors.

CSI was also engaged to repair the building's exterior brick façade, where the top parapet wall of the original two-story building met with the façade of the new third-floor section of the building.

### THE CSI SOLUTION

Working closely with the project Engineer, Architect, and the City of Annapolis, CSI developed and performed a successful solution.

The CSI team repaired the flashing and waterproofing between the floors, using an Emseal - Colorseal product, along with Henry Blue Skin, traditional sheet metal and through-wall flashing to stop and prevent further leakage.

Since 1996, **Contracting Specialists Incorporated** has steadily emerged as a leader in specialty construction, providing clients with proven and innovative solutions for concrete restoration, masonry restoration and waterproofing.
