Emergency Entrance at Children's Hospital Boston

Installation of Non-slip Waterproofing Coating

DESCRIPTION:

CSI was awarded the contract to install a new nonslip waterproofing coating at the main entrance to the Emergency Department at Children's Hospital Boston.

This project involved:

- Removal of the existing deteriorated urethane coating, which posed a serious trip hazard
- Repair and restoration of the underlying spalled and compromised concrete substrate
- Installation of a new epoxy coating system

The new system required an aggregate mix of aluminum oxide to create a high density and durable system which provides high levels of traction in all weather conditions.

CSI also repaired the retaining wall of the entrance area and applied a new urethane wall coating to help protect and enhance the visibility of the wall.

This work was completed in a very high traffic area with no interruption to the operations of the Emergency Department and minimal impact on the users of these vital hospital services.

OWNER: Children's Hospital Boston
Boston, MA

ENGINEER/ARCHITECT: G. Greene

Since 1996, **Contracting Specialists Incorporated** has steadily emerged as a leader in specialty construction, providing clients with proven and innovative solutions for concrete restoration, masonry restoration and waterproofing. Visit www.contractingspecialists.com
