Herald Street Parking Garage - Boston, MA

Concrete Repair & Installation of Durable Waterproof System

2008:

CSI was awarded the contract to repair structurally compromised and deteriorating horizontal slabs and overhead concrete elements at the Herald Street parking garage as part of the overall maintenance and upkeep to maintain the viability and utility of Tufts New England Medical Center's parking system.

This involved the identification of the deteriorated locations and their subsequent demolition, reinforcement and repair. A number of drains were also installed to facilitate improved drainage on the parking decks and further protect the structure.

All work was completed while keeping the garage operational and with minimal impact on the medical staff using the facility.

2009:

CSI was awarded the contract to install a waterproof traffic topping system to the two outdoor parking levels of the Herald St. Garage.

With minimal impact on the use of the garage, CSI prepared the existing garage surface and installed a durable waterproof system on schedule and on budget, despite considerable periods of inclement weather.

This installation was a continuation of the previous concrete repair work CSI completed at the garage in 2008.

OWNER: Tufts New England
Medical Center

ENGINEER/ARCHITECT:
Desman Associates
