John O'Bryant School Plaza Repair and Waterproofing

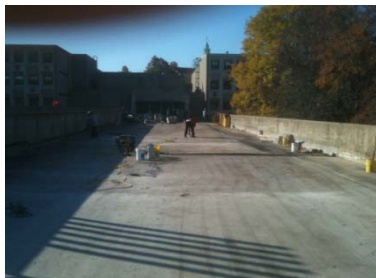

OWNER: Boston Public Schools

ENGINEER: Miller Dyer Spears Inc.

CSI was awarded the contract to install the waterproofing portion of the new school plaza and stairs at the John O'Bryant School educational complex.

Once CSI had completed the required surface repairs on the concrete plaza deck, a hot applied waterproofing system was installed to secure the watertight and protective integrity at the raised plaza. CSI also installed the waterproofing sealant at the new exterior stair window wall construction and at all the new flashing installed as part of the decorative concrete topping slab installed over the newly applied waterproofing.

CSI completed the project with minimal impact on the operations of an active school and maintained a safe productive worksite paying close attention to the sensitive environment in which the work was taking place.

Since 1996, **Contracting Specialists Incorporated** has steadily emerged as a leader in specialty construction, providing clients with proven and innovative solutions for concrete restoration, masonry restoration and waterproofing. Visit www.contractingspecialists.com
